

CENTRAL DELANNOY NUMBERS AND
BALANCED COHEN-MACAULAY COMPLEXES

Abstract

We introduce a new join operation on colored simplicial complexes that preserves the Cohen-Macaulay property. An example of this operation puts the connection between the central Delannoy numbers and Legendre polynomials in a wider context.

2000 AMS Subject Classification: Primary: 13F55; Secondary 05A15, 16E65, 33C45.

Key words and phrases: balanced simplicial complex, Delannoy numbers, Cohen-Macaulay property.
